Assessing Office:

New Homeowners eventually deal with the topic of Uncapping. In the year you purchase a property, you are assuming the sellers tax rate. The year following the purchase is when an “Uncapping” takes place. Under Proposal A, which passed in 1994, a property is “uncapped” in the year following a transfer of ownership. This means that the taxable value for the year following a transfer will be the same as the assessed value for that year. This is sometimes referred to as the pop-up tax. The year after the property is uncapped, increases to the taxable value will once again be limited by the Consumers Price Index or 5%, whichever is lower, unless there are physical changes made to the property.

Battery Recycling:

Battery recycling courtesy of Livingston County Solid Waste Program, a division of the Livingston County Drain Commissioner.

You can drop off household batteries and rechargeable batteries for recycling at the Township Hall. Household batteries defined as size “D” and smaller batteries.
